

[White Men Can T Iron On Butt Row 1997 13](#)

Endophytes were isolated from healthy leaves and pods of
Theobroma cacao plant

Dual culture assays

Antagonistic activity of endophytes against three pathogens; *Moniliophthora perniciosa*, *M. roreri* and *Phytophthora palmivora*

Used 3 methods – antibiosis, competition for substrate and mycoparasitism

Greenhouse experiment

Spore suspension of endophytes were inoculated to cacao leaves and the percent of fungal colonization per leaf assessed plating on culture media

Field trials

Spore suspension was sprayed to cocoa pods and measure the percentage of each pod had been colonized by the inoculated fungus
